

Moshman Dental is dedicated to practicing the highest standards of infection control. In light of the current pandemic, we are implementing the following infection control protocols:

- 1) We will take the temperature of every patient upon entering the office with a non-contact infrared forehead scanner. If someone has a temperature of over 100.4F, they will be sent home.
- 2) We will require a mask to be worn by ALL patients upon entering the office. If you do not have a mask, one will be provided for you.
- 3) We have removed magazines and items that can harbor or transfer germs of any kind from our waiting room. Hand sanitizers will be positioned throughout the office.
- 4) We will require hand washing and hand sanitizing before all appointments by our team and by our patients.
- 5) We will introduce an oral pre-rinse by all patients to reduce exposure to germs.
- 6) We have updated many aspects from analog to digital to eliminate as much contact as possible. This includes:
  - a) all health and insurance forms to be completed prior to appointment via email.
  - b) all consent forms can now be signed via iPad in office (iPad wiped down before and after each patient).
- 7) We will ask for a credit card to be saved on file in advance to allow for contactless payment after the appointment.
- 8) Enhanced operatory disinfection procedures of all surfaces between patients.
- 9) We have added ambient air management with UV-HEPA air filtration continuously in all treatment rooms to remove viruses from circulating in the air.
- 10) We have invested in new layers of personal protection equipment including visors, gowns, and high-level masks for our doctors and team to provide barriers against the smallest of germs.
- 11) Clinical staff will change into a new lab coat for each patient treatment.
- 12) We will introduce protocols to reduce airborne aerosols during all dental procedures.
- 13) We have enhanced nightly disinfection procedures of equipment and office fixtures like computers, keyboards, telephones, tablets, chairs, doorknobs, and buttons that may be touched unconsciously.
- 14) We will schedule longer appointment times for you to prepare and complete all appointment tasks and duties in the safest and most comprehensive manner.
- 15) Sneeze guards have been placed for all interactions with the front desk.
- 16) Our entire staff has completed three days of training devoted to these infection control procedures prior to seeing any patients.
